PM (g/km)	N/A	N/A
Engine CC	1796	
Registration Tax	€3,815.00	€3,815.00

CONDITIONS

1. The registration value of a motor vehicle is the residual cost, including the insurance and freight (CIF), of an equivalent or similar vehicle which was purchased new in Malta and that would pass a VRT Test, is mechanically sound, free of any damages and in its original condition. The formula used to derive the registration value is [Average Used Price x (CIF New/Price New)], where the average used price is calculated by deriving price ratios, combining local consumer prices or opinion values provided by authorised dealers where consumer prices are insufficient and information which is published by CAP Motor Research Ltd. All this information provide a framework for publishing the registration values for the majority of used motor vehicles being brought into Malta. The (CIF New/Price New) ratio is calculated on the basis of information held by Transport Malta.
2. The values provided are subject to verification of the vehicle details by Transport Malta.
3. For registration purposes the registration value (RV) on the valuation printout is valid from the month of the valuation until the end of the following month.
4. If a vehicle has not been registered for more than 6 months after the date of first entry into service and/or has not travelled for more than 6,000 km, an additional 18% VAT on the Invoice value shall be paid.
5. Official Documentation includes the Certificate of Conformity, the foreign Vehicle Registration Certificate or a declaration made by the manufacture.
6. The registration tax for M1 vehicles is calculated according to the Euro standard, carbon dioxide emissions (CO2)(g/km), particulate matter (g/km) (in the case of diesel engine), registration value and length (mm). In the case of M2 and M3 vehicles the registration tax is calculated according to the Euro standard, maximum authorised mass (kg) and engine cubic capacity (cc).
7. A minimum registration tax applies to all used M1 motor vehicles imported from non-EU countries and which have a vehicle age in excess of five (5) years.
